

Picture Blocks – Step by Step

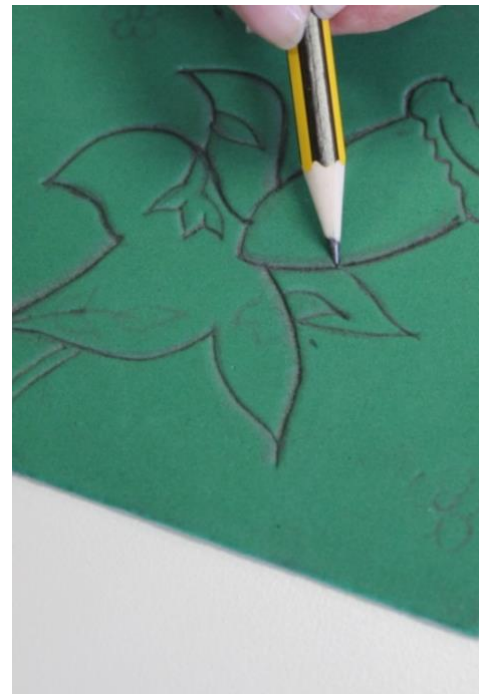

1. Simplifying drawings and building up your block design

Trace over the **outline** of your first drawing. Turn the paper and trace over the next drawing. Repeat this process until you are happy with your block design.

2. Transferring the design to craft foam

Turn over the tracing paper and place it onto a piece of craft foam. Draw over the lines to transfer the image onto the craft foam.

Picture Blocks – Step by Step

3. Building the block

Cut the picture block design out of the foam. Place your cut pieces on your tracing paper to see how and where you will place them on your wooden block. Peel the white paper off and stick foam down on your 10cm² wooden block.

4. Mark making

Once you have stuck down all of the pieces use a blunt pencil to make marks on the foam. Press down firmly. You can use your original drawings and your mark making template to help you.
